## Seawork 2013

We would like to thank all of you who visited our stand at the Seawork 2013 exhibition in Southampton last week.

Our experience at the RG Seasight Fenders stand was good especially because of the many visitors we had. We are pleased that the exhibition gave us the opportunity to talk to both current costumers and new potential customers. The dialogue and your comments on our fenders are important to us and we appreciate it very much.

In addition to the good dialogue on the fenders, we also received many inquiries on new fenders as well as we bring home a fair share of orders. All in all we had a very good exhibition.

### Our hard work pays of

We work hard every day to make durable fenders of the best quality. Even though we believe that our mission has succeeded, the most important thing is that you agree. According to the feedback we got at Seaworks 2013 it appears to be so.

A large number of our customers have emphasized that RG Seasight Fenders gives them a better performance than other fender systems. That is particularly due to them being able to sail in higher waves than before which gives more days at sea.

We hope to see you again in November at the EWEA OFFSHORE 2013 in Frankfurt, Germany.

**We thank you for an outstanding exhibition and the huge interest you have shown our products.**
